

What to look for in Compass Odyssey Student Reports

Progress Summary Reports

Summary					
Type	Number Complete	Number Passed	Average Score	Status	Duration (hh:mm:ss)
 Learning Activity	5	-	57%		00:35:11
 Lesson Quiz	9	8	87%		00:23:04

***Number Complete**- Remember that each student should be completing 17-20 each week! If it is below this we need to be concerned! If we want our students to accelerate they need to be completing these activities as quickly as possible *with an appropriate Average Score*.

***Average Score**- This is equally important, if not more important! Make sure that their average is at least a 70%. If it is not, you should generate a Student Progress Report to look at the specific skills in which the student has not mastered.

Student Progress Reports

Activities	Completed Date	Completed Time	Score	Status	Duration (hh:mm:ss)
Chapter: Addition and Subtraction (Math, 3)					
Lesson: Estimate Sums and Differences					
Estimate Sums and Differences	10/04/2010	10:52 AM	40%	<div><div></div></div>	00:05:12
Estimate Sums and Differences	10/04/2010	11:02 AM	40%	<div><div></div></div>	00:03:59
Feeding Frenzy - 40989	10/04/2010	10:58 AM	83%	<div><div></div></div>	00:05:54
Fishy Estimations - 34203	10/04/2010	10:46 AM	33%	<div><div></div></div>	00:20:01
Tutorial: Estimating Differences - 3B019	10/01/2010	10:52 AM	N/A	N/A	00:09:40
Tutorial: Estimating Sums - 3B018	09/29/2010	1:33 PM	N/A	N/A	00:09:36

* **Score**- This is where you should start. When you notice a score that is below mastery (70%), look to the left and see what the activity/skill was that was not mastered. At this point you should remediate (ex: in small groups). You can then unlock their activity and have them go back to their learning path.

* **Duration**- Make sure they are not spending too little or too much time on the activities. Each Activity should take anywhere from 4-6 minutes. 30 minutes/ day, 5 days/week would total about 25 activities per subject each week.

* **Activities**- When you see two activity titles with the same name, that tells you the student had to repeat the activity because of low performance. Look at the date and time they did each and see if the score improved.
